A truly global multi-asset income solution

The Manulife Global Multi-Asset Diversified Income Fund (“the Fund”) leverages on the multi-asset strategy* of the Target Fund** which combines multiple sources of income, offers greater potential to generate high income and achieve diversification, while being less vulnerable to market shocks.

* No portfolio management strategy or risk management technique can guarantee a profit or protect against loss.

** Manulife Global Fund – Global Multi-Asset Diversified Income Fund.

Deploy multiple income sources for new growth horizons

- In today’s low-rate environment, investors are looking for higher yields in addition to steady incomes in their portfolios. To meet these goals, an increasing number of investors are choosing non-traditional income assets, such as preferred securities, real estate investment trusts (REITs) and equity option strategies.
- These non-traditional assets can be beneficial because they provide relatively higher yields and have a low correlation to other assets.
- A multi-asset allocation approach, which includes a mix of bonds and equities, could potentially help investors *create solid and stable income*. This approach may also add a defensive tilt to the portfolio during market stress periods.

Traditional and non-traditional asset classes

Fixed income	Equity and equity related securities
Investment Grade Corp Bond (IG corp bond) Can offer a high quality source of income and a portfolio risk diversifier	Global equities Provides dividend income with capital growth potential
High Yield Corp Bond (HY corp bond) Offers the potential of a higher yield with less interest rate sensitivity	Global REITs Traditionally stable and transparent yields
Emerging Market Bond (EM bond) Taps into EM growth potential and seeks to offer attractive yields	Equity option strategies Seeks income through option premiums, and helps manage the volatility of equity investments
Preferred securities Hybrid securities that combine fixed income and equity features	

Capture more income sources with a broad investment universe

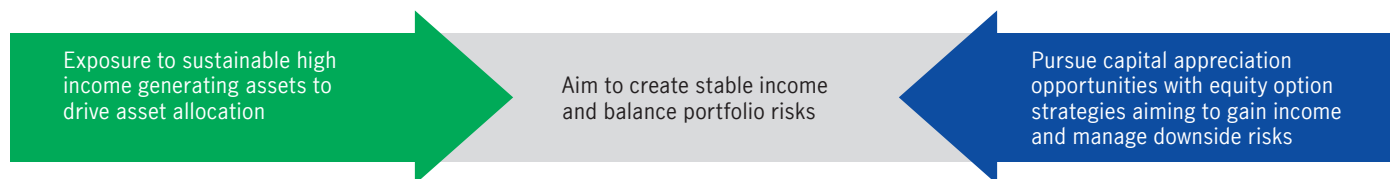

Asset performance and yields can fluctuate in different economic cycles. Investors can broaden their investment universe within bonds and equities which in turn provide less correlated income sources and should increase overall yield stability.

Yields of each asset class per annum (2004 - 2019)[^]

Fixed income

Equity and equity related securities

Source: Manulife Investment Management, Bloomberg, MSCI, as at 31 December 2021. IG corp bond refers to J.P. Morgan US Investment Grade Index, EM bond refers to J.P. Morgan EMBI Global Index, HY Corp bond refers to BBgBarc Global High Yield Corp Index, Preferred securities refer to ICE BofAML Fixed Rate Preferred Securities Index, Global equities refers to MSCI World Index, Global REITs refers to FTSE EPRA/NAREIT Index, Equity option strategies refer to CBOE S&P 30 Delta BuyWrite Index and CBOE S&P 500 PutWrite Index.

Typical yield per annum is based on historical yields in 2004 – 2019, with exception of Equity option strategies, which is based on proprietary research during 2008 – 2019 by data from Manulife Investment Management. Information is for reference only and no guarantee of future results and is not recommendation to buy and sell. The latest yield per annum of IG corp bond, HY bond, EM bond, preferred securities, global equities and global REITs are 2.4%, 4.7%, 5.3%, 4.2%, 1.8% and 3.0% respectively as of 31 December 2021. Equity option strategies yield is updated until 2019 since data is not available. The chart provides pre-pandemic historical yield information and for illustration purpose only.

Flexible and diversified allocation

- A wide range of asset classes across different investment styles and regions, together with a flexible investment strategy, opens up income opportunities.
- A mix of asset with low correlation can provide diversification benefits and potentially improve risk adjusted returns.

Traditional and non-traditional income sources tend to be less correlated

■ Relatively low correlation ■ Moderate correlation
■ Relatively high correlation

		Non-traditional income source		
		Global REITs	Preferred securities	Equity option strategies
Traditional income source	IG corp bond	Relatively low	Relatively low	Relatively low
	HY corp bond	Moderate	Moderate	Moderate
	EM USD bond	Moderate	Relatively low	Moderate
	Global equities	Relatively high	Moderate	Relatively high

Source: Bloomberg, correlation coefficient is calculated based on weekly performance from December 2006 to December 2021. Correlation ranges from +1 (perfect positive correlation) to -1 (perfect negative correlation). Relatively low correlation refers to correlation coefficients equal to or smaller than 0.5, moderate correlation between 0.5 and 0.75 (inclusive), and relatively high correlation above 0.75. Representative indices of each asset classes: Global REITs measured by FTSE Nareit Global REIT Index, Preferred securities measured by ICE BofAmL Fixed Rate Preferred Securities Index, Equity option strategies measured by 50% CBOE S&P 500 BuyWrite Index and 50% CBOE S&P 500 PutWrite Index, IG corp bond measured by BBgBarc Global Agg Corp Bond Index, HY corp bond measured by BBgBarc Global High Yield Corp Index, EM bond measured by J.P. Morgan EMBI Index, Global equities measured by MSCI AC World Index.

Provide a potential downside buffer through equity option strategies

Based on historical data, while equities generally provide higher returns over time, they have higher volatility than bonds. Investors can use equity option strategies to potentially gain high yields through premiums while managing the risk in equities and also reduce volatility in their investments. This strategy is helpful in seeking a downside buffer during periods of market stress.

The above information may contain projections or other forward-looking statements regarding future events, targets, management discipline or other expectations. There is no assurance that such events will occur, and the future course may be significantly different from that shown here.

Performance during market volatility

Events	S&P 500	Equity option strategies
Net/dot.com bubble – 9/11 attacks (09/04/2000 – 10/09/2002)	-47.41%	-31.01%
Global financial crisis (10/09/2007 – 03/09/2009)	-55.25%	-36.80%
COVID-19 (19/02/2020 – 23/03/2020)	-33.79%	-29.58%
