Real Assets: Built to perform in higher-inflation market conditions

A portfolio that goes beyond traditional stocks and bonds, designed to maximise returns amidst inflationary times.

Manulife Diversified Real Asset Fund (formerly known as Manulife Global Resources Fund) invests in real assets that typically align with inflationary growth, offering a layer of resilience against inflationary pressures and the potential for more stable returns during volatile market cycles.

**Fixed Income**

**Global Listed Infrastructure**

**Metals & Mining**

**Global REITs**

**Energy**

A diversified portfolio to hedge against inflation

**Natural Resources**

Supply limitations typically contributes to higher prices, boosting inflation and increasing cash flow and profits.

**Infrastructure**

Inflation-linked costs and fees in regulated infrastructure can drive stronger cash flows and asset growth.

**REITs**

Rising property values and growing demand during inflation boost REIT cash flow and dividends.

**Fixed Income**

U.S. TIPS adjust for inflation, while short-term Treasuries and credit may deliver enhanced income and inflation protection than long-term fixed income.

For illustrative purposes only. Diversification does not guarantee a profit nor protect against loss in any market.

Reliable return potential amid market volatility

Real assets have outperformed many traditional asset classes, offering protection and more resilient return potential amid rising inflation.

When inflation is rising

When inflation is falling

Past performance does not guarantee future results.
