There are risks involved with investing in unit trust funds; wholesale funds and/or private retirement schemes. Some of these risks associated with investments in unit trust funds; wholesale funds and/or private retirement schemes are currency risk, country risk, credit and default risk, concentration risk, stock specific risk, reclassification of Shariah status risk, fund manager/ investment manager/ target fund manager risk, liquidity risk and interest rate risk. For further details on the risk profile of all the funds, please refer to the Risk Factors section in the Offering Documents. The price of units and income distribution may go down as well as up. Investors should compare and consider the fees, charges and costs involved. Investors are advised to conduct own risk assessment and consult the professional advisers if in doubt on the action to be taken.*Relevant Offering Documents can be found at Fund documents (manulifeim.com.my)
Investing involves risks, including the potential loss of principal. Financial markets are volatile and can fluctuate significantly in response to company, industry, political, regulatory, market, or economic developments. These risks are magnified for investments made in emerging markets. Currency risk is the risk that fluctuations in exchange rates may adversely affect the value of a portfolio's investments.
