# What are REITs?

REITs, or Real Estate Investment Trusts, are collective investment schemes that are listed as corporate stocks. REITs investors own the property indirectly through share units which they hold and regularly gain income from the property's portfolio.

## How do REITs work?

REITs have a simple business model: Generating income by leasing out properties. The property is managed by a professional team which actively seeks to lift the value of the property and the rent to increase potential income.

## Advantages of investing in REITs

### Regular, predictable distributions

In accordance with regulatory requirements, most REITs distribute at least 90% of their earnings (rental payments) as dividends to investors.

### Capital appreciation

Asia-Pacific REITs (AP REITs) offer the potential for capital appreciation due to the continuous optimisation of their property portfolios together with overall increases in rent.

### Professional property management

A good REIT is managed by professionals who have specialised experience in a particular pocket of the real estate market. This enables them to optimise property investment returns.

## Different types of REITs

REITs aim to deliver a source of recurrent income to investors through focused investment in a portfolio of income-generating properties such as shopping malls, offices, hotels and service apartments.

### REITs by sectors

#### Retail REITs

e.g. Retail stores, shopping malls and outlet centres

#### Office REITs

e.g. Grade A office, office parks and offices in industrial areas

#### Hotel and Resort REITs

Different classes of hotels & resort based on features such as the hotels' level of service and amenities

#### Industrial REITs

e.g. Warehouses, logistics centres and data centres

#### Healthcare REITs

e.g. Hospital, seniors facilities, nursing home and cosmetic surgery centres

Recurrent income

# Why Asia Pacific REITs?

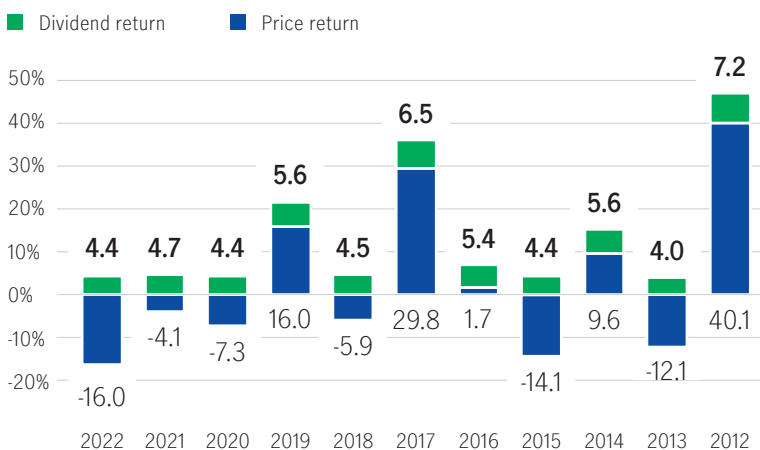

## Consistent income return

Asia REITs have historically delivered a consistent dividend income. Out of the 11.4%\* annualised total return registered during the period of 2009 to December 2022, around 50% was contributed by dividend.

Asia ex Japan REITs are represented by FTSE EPRA/NAREIT Asia ex Japan REITs Index (capped). Performance in USD. Past performances are not an indication of future performances.

## Attractive dividend yield potential

Major Asia Pacific REIT markets currently offer relatively attractive yields compared to other yield-oriented securities.

The above information may contain projections or other forward-looking statements regarding future events, targets, management discipline or other expectations. There is no assurance that such events will occur, and the future course may be significantly different from that shown here.

## Yield comparison vs equity/government bond (%)

Source: Bloomberg, FTSE Russell, as of November 30, 2022.

REIT Yield: Singapore REIT – FTSE ST Real Estate Investment Trusts Index, Hong Kong REIT – FTSE EPRA Nareit Hong Kong Index, Australia REIT – S&P/ASX 200 A-REIT Index.

Equity Dividend Yield: Singapore equity: Straits Times Index, Hong Kong equity: Hang Seng Index, Australia equity: S&P/ASX 200 Index.

For illustrative purposes only. The above yields do not represent the distribution yield of the Manulife Investment Asia-Pacific REIT Fund and are not an accurate reflection of the actual return that an investor will receive in all cases. A positive distribution yield does not imply a positive return. Past performance is not an indication of future results.

## Inflation hedge

Inflation that is a result of economic growth tends to translate into greater demand for real estate and subsequent higher occupancy rates, supporting growth in REIT cash flow and dividends.

Over the past decade, Asia REITs have delivered higher dividend return on average compared to inflation of major REIT markets.

The above information may contain projections or other forward-looking statements regarding future events, targets, management discipline or other expectations. There is no assurance that such events will occur, and the future course may be significantly different from that shown here. Past performances are not an indication of future performances.
