# Why invest in global water equities now?

The water domain is poised for continued attractive growth potential due to these *five* compelling drivers:

## Urbanisation

- 68% of the world's population is expected to live in cities by 2050<sup>1</sup>.
- Governments are placing more focus on urban development and infrastructure planning and management.

## New infrastructures and upgrades

- Ageing infrastructure has caused inefficiencies in water supply and may present health risks<sup>2</sup>.
- Countries such as China, India, Singapore and the US are expected to invest in the upgrading of their infrastructure to meet water demand and tackle water pollution<sup>3</sup>.
- This has positive implications for growth opportunities within water sector companies.

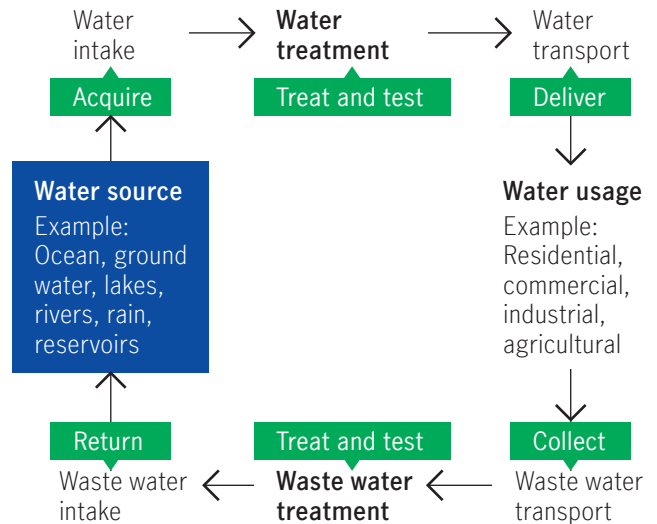

## Water scarcity

- Increased urbanisation and high water consumption due to modern lifestyles are driving an increasing demand for clean water.
- Demand for water is expected to exceed supply by 40%<sup>4</sup>.

## Rapidly growing water value chain

There are numerous growth opportunities for investors across the entire water value chain, in order to keep up with supply and demand.

### Mapping of the water value chain<sup>5</sup>

## Technological innovation

In the UK, a center of excellence will be established to allow water companies to collaborate, access skills and drive transformational change through water innovation<sup>6</sup>.

# Resilient performance

The water opportunity is surprisingly diverse and resilient. It runs through the global economy; across many end-markets, sectors and regions, providing attractive opportunities through the full economic cycle encompassing both defensive and cyclical businesses.

## Target Fund\*: Awarded with sustainable investing labels

SRI (Sustainable and Responsible Investment) label<sup>8</sup>

Towards Sustainability label<sup>9</sup>

\* Target Fund refers to BNP Paribas Funds Aqua.

<sup>8</sup> Source: BNP Paribas Asset Management - BNP Paribas Aqua, Investing in Blue Gold, July 2022: Label SRI, June 2022. The "Sustainable and Responsible Investment" (SRI) label is a tool for selecting responsible and sustainable investments. It also aims to ensure that the management of the fund is based on a solid methodology, with a high degree transparency and quality information. More information is available on [www.llelabelisr.fr](http://www.llelabelisr.fr).

<sup>9</sup> Source: BNP Paribas Asset Management - BNP Paribas Aqua, Investing in Blue Gold, July 2022: Towards Sustainability, June 2022. Created by the Belgian federation of the financial sector in 2019 (Febelfin), the Towards Sustainability label was designed as a standard or quality standard that all funds claiming to be sustainable, socially responsible, or ethical must respect. It aims to become a market standard, at least for Belgium. More information is available on the [www.towardsustainability.be/](http://www.towardsustainability.be/)
